

Garbolino

Super G8

WE RESERVE THE RIGHT TO
SELL THIS EXQUISITE POLE TO
JUST 'ANY OLD' ANGLER.

Garbolino. A name that's now become synonymous throughout the range with 'performance' and 'build quality'. Created from the finest high grade carbons and fused together with a design and technology process to build what has become 'must have' tackle.

These qualities are used in abundance in the awesome Garbolino Super G8 16m pole. Ultra light, ultra strong and ultra rigid (even at 16m) and formed from ultra high modulus low resin carbon. The Garbolino Super G8 is 'the' long pole for the serious matchman who demands reliability and performance time after time.

The specifications are endless but here's a quick flavour. Reinforced joints internally and externally, fishing standard kits to size 12 and power kits up to size 20. The short number 4 sections offer extra rigidity and power, plus a 'ready to bush' number 1 section fits a number 6 elastic without cutting back. The smooth 'slip n slide' finish speeds up shipping making the pole a pleasure to use.

The Garbolino Super G8 - The long pole created for the matchman who requires, how shall we say, "an exquisitely refined tool for the more discerning angler".
