

SUITS YOU SIR!

Garbolino. A name that's now become synonymous throughout the range with 'performance', 'power' and 'build quality'. Created from the finest high grade materials then fused together with a design and technology process to build what has become 'must have' tackle.

These qualities are used in abundance in the 'never been done before' unique design of our new Super G Waggler and Feeder rods. With extensive step by step design and testing carried out by Darren Cox these rods have been moulded to incorporate exacting actions whatever your method, whether your after skimmers, roach or baggin' carp.

Incorporating quality SIC guides and Fugi reel seats throughout, these rods have been finely tuned with fast play progressive power actions which makes casting and playing fish simple! The feeder tips have been formed from unique blends of carbon and fibre glass to give each its own specific handling characteristics, making bite detection easy whatever your target species. Garbolino Super G rods are 'the' tools for the serious matchman who demands reliability and performance time after time.

Garbolino Super G rods - Technically advanced purpose designed tackle for the matchman who wants, how shall we say, "to have his cake and eat it".
